Performance Review

The Net Asset Value ("NAV") per share of IPRO Growth Fund Ltd ("IGF") increased from Rs. 31.53 (as at 30 June 2024) to Rs. 32.00 (as at 30 June 2025) over the financial year 2024/2025. During the year, the Fund raised its dividend from Re. 0.68 to Re. 0.82 per share. Taking the dividend into account, IGF delivered a total return of 4.1% for the year.

IGF is a diversified fund that invests both locally and internationally, mainly into equity securities and funds. The Fund also holds a sizeable allocation to precious metals. As of 30 June 2025, 62.6% of the Fund's assets were denominated in foreign currencies, with the remaining 37.4% in Mauritian rupees. In terms of asset classes, equities represented 57.3% and precious metals 12.4% of the portfolio, while fixed income and cash made up 30.3%. The Fund prudently increased its cash holdings in the last quarter in response to rising global trade tensions and their potential negative impact on the global economy and financial markets.

Both the local and international portfolios contributed to the Fund's positive performance during the financial year 2024/2025. On the local front, the SEMTRI returned 15.3% over the 12-month period. MCB Group Limited. Phoenix Investment Co Ltd, and LUX Island Resorts Ltd remain the Fund's largest holdings, with total returns of 19.5%, 42.8%, and -6.6% respectively.

Internationally, precious metals were key contributors. The iShares Physical Gold and Silver ETCs returned 41.0% and 22.7% in USD terms. Investor interest in gold was fueled by geopolitical risks, uncertainty around trade tariffs, central bank buving, and de-dollarization. Among equity funds, the Gavekal Asian Opportunities Fund led with a 12.5% return. Emerging market equities, which had underperformed developed markets for much of the past decade, are now showing signs of a turnaround. Over the review period, emerging markets delivered returns nearly on par with developed markets and even outperformed them over the past six months.

While financial markets have generated strong returns in recent periods, this performance masks a complex investment environment marked by elevated uncertainty around trade policy, geopolitical developments, and the U.S. fiscal outlook. The IGE team continues to monitor developments closely and sticks to an overall cautious approach. The high allocation to cash and short-term fixed income provides opportunities to management to selectively increase the equity exposure of the Fund. In recent months, management has started to invest directly into international equity securities of quality companies, with the view to generate higher returns for shareholders. These investments should become more prominent in the portfolio of IGF during the financial year
