

## Stock Exchange of Mauritius

# COMMUNIQUE

### A new *mySEM* App goes live on 13 May 2022

---

The Stock Exchange of Mauritius (SEM) is going live on 13 May 2022, with a fully responsive *mySEM* app with a new look and feel, which complements the overhaul of SEM's technological infrastructure following the launch of a new high-end Automated Trading System (ATS). The new *mySEM* app retains the key features of the previous one, and introduces new and enhanced interactive app functionalities for the benefit of investors. The previous *mySEM* app, downloadable from Google Play and App Store, can no longer be used as from 13 May 2022.

The new *mySEM* app version is a Progressive Web App (PWA), delivered through the web via URL <https://mysem.stockexchangeofmauritius.com> and can be used on any platform (desktop and mobile) using a standard compliant browser. The user-name/password credentials to access the new *mySEM* App, remain the same for investors registered for the *mySEM* app.

The *mySEM* app is fully responsive and fully optimised for all smart devices, catering for existing and prospective investors wishing to access the *mySEM* app through mobile phones or tablets. Investors will be able to navigate on *mySEM* more efficiently with minimum resizing and scrolling from any smart device. The *mySEM* app is currently not available in app stores, but will be available for future releases. In order to access *mySEM* on a mobile device, a user needs to open the URL <https://mysem.stockexchangeofmauritius.com> using the mobile browser, and simply use the browser menu to save the *mySEM* app on the mobile home screen. As a PWA, *mySEM* app is therefore easily accessible through a mobile phone's browser, and can be added to the user's home screen.

The *mySEM* app aims at empowering investors to follow the market in real time, seize market opportunities and trade in real time, and have online access to their CDS accounts to monitor their account activity and account status. In addition to the new look and feel, *mySEM* also provides investors seamless access to a wide variety of market data in real time, including company specific order books, highs and lows, best bids and asks, and other relevant company-specific data. It also introduces interactive charting for all listed securities on different time-scales up to 5 years. To learn more on the *mySEM* app, investors can download the *mySEM* manual from SEM's website on web-page <https://www.stockexchangeofmauritius.com/education-investor-services/investor-services/mysem-manual>

This new *mySEM* app relates to a number of ground-breaking initiatives implemented by the SEM in recent years to avail investors of improved digital services and enhanced trading and operational efficiency. This initiative also aims at further democratising the share ownership culture in Mauritius and placing the stock market within the palm reach of retail investors.
