## COMMENTS

Group net results increased from a loss of Rs 4.9 million for the quarter ended September 30, 2022 to a profit of Rs 47.0 million for the quarter under review. Earnings per share likewise increased from a loss of Rs 0.27 in 2022 to Rs 1.59 for this quarter.

Group revenue for the quarter ended September 30, 2023 increased by 11.6% (+Rs 133.3 million) compared to that of the same period in 2022. This rise was attributable mainly to our core business activity segment. FAST (Flacq Associated Stonemasters Limited), which is now consolidated as a subsidiary, unlike in 2022, contributed Rs 40.3 million to the revenue increase for the quarter under review.

Group operating profit increased significantly from Rs 15.7 million for the quarter ended September 30, 2022 to Rs 88.6 million for the quarter under review. Our local core business performance for the quarter, compared to the same quarter in 2022, was positively impacted by increases in our selling prices required to restore our profit margins further to the effects of inflation on our costs. The performance of Premix Ltd was also much better than for the same period in previous year.

Despite a slight increase in revenue, our retail segment's performance was down compared to the same quarter in previous year due to an increase in staff costs and other operating expenses. Conversely, our agricultural segment performed better than in 2022 due to the improved performance of our vegetable-growing and greenhouse activities, and an increase in the yield and price of sugar.

Our share of results from associates for the quarter under review increased by 19.1% compared to the same quarter in 2022, due to the improved performance of Terrarock Ltd.

Our finance costs increased significantly due to an increase in borrowings and interest rates

## OUTLOOK

Our improved performance for the quarter is expected to be maintained during the next quarter should the ongoing property development and infrastructure projects continue to progress steadily
